

To recreate the mailbox database, here are the steps:

1. Backup the Mailbox database
2. Dismount the Mailbox Store as well as the Public Folder Store
3. Move all files under C:\Program Files\Exchsrvr\MDBDATA to another safe location.
4. Mount the Mailbox Store, it will create the necessary files automatically.
5. Copy the pub1.edb and pub1.stm from the safe location to the C:\Program Files\Exchsrvr\MDBDATA folder, and then mount the Public Folder Store.
6. After that, you may import the PST back to the users' mailboxes.
